

PLAN 'WORKSHOP' THEATRE ALONG HARVARD LINES FOR PROPOSED ARTS BUILDING

Interviews granted by Dr. Ira MacKay and Dr. Macmillan
—Dean of Arts states that Governors have definitely decided to rebuild—Final designs have not yet been announced—Head of the English Department hopes to have theatre, which will be used for practical demonstration purposes—Need of further instruction along these lines have been felt during the past years.

"The decision of the Board of Governors to rebuild the old Arts Building is perhaps the best news I have received for many a day," said Dean Ira MacKay of the Arts Faculty when asked to comment on rumours concerning a new home for his Faculty. Yesterday afternoon the Dean was at work on plans for the proposed edifice but willingly sacrificed some time to describe the various problems that will have to be solved.

Two difficult questions concern the front view of the Arts Building and the construction of Moysse Hall. How much can be done towards maintaining roughly the present site and outward appearance of the building while attempting to incorporate in it necessary conveniences? This is one problem that must be solved.

In the interior of the new building the designers meet with a second difficulty. Present plans point towards the construction of a model Demonstration Theatre which will combine a maximum of utility with the greatest internal beauty and design. So far as is consistent with the funds at the disposal of the Board, this will be the Moysse Hall with a seating capacity of between four and five hundred. There is very little likelihood that any larger room will be built, Dean MacKay stated. There have been some rumours that some sort of a community theatre that would accommodate eight or nine hundred people might be built, but these are entirely unfounded in the Dean's opinion. The Moysse Hall will be a lecture room for the larger classes of the Arts Faculty, and will have special acoustic properties which will lessen the strain on a lecturer's voice.

In the Hall will be a model stage, fitted for demonstration purposes. Its character is as yet indefinite but in all probability it will be in two sections the one nearer the audience or

Considerations Suggested By Dr. Eve's Lecture On Limitations Of Science

By Dr. J. W. A. Hickson

In the course of a charming address at the McGill Philosophical Society last Thursday Dr. Eve touched in a stimulating way on some important philosophical questions involved in, and underlying, the application of scientific method. A fundamental one was whether the order in science was wholly in the mind or in the physical reality. The lecturer did not dispute the existence of an independent reality although he seemed uncertain whether the proposition that nothing exists but mind might not be true. We are not concerned in the following to discuss this old, and, as we think, often refuted thesis of Idealism. It may suffice for the present to remark that it is neither an axiom, nor well founded induction; nor is it, so far as I am aware, deducible from any established proposition.

Respecting the basis of the order that we find in experience, it can hardly be doubted that it is not wholly in any one individual mind or that it is not exclusively a mental affair. If it were then by cogitation at our desks we should be able to discover all the laws of Nature the various constants of Nature and the empirical formulae which go to make up the body of the sciences physical and psychological. Observation and experiment would be superfluous.

An ambitious philosopher like Hegel, who represents the extreme of logical idealism, thought he could proceed in this way, and attempted a demonstration of Newton's law in which the cube of the distance takes the place of the square. The same pretentious metaphysician offered a demonstration of the law of falling bodies in which no reference is made to the spaces, times or accelerations. The Hegelian Lord Haldane is not in the least interested in the perihelion of Mercury, which for his

(Continued on Page Three)

LAST MEETING OF FRENCH SOCIETIES

Entertainment in R. V. C. Common Room Last Night

Last night the Societe Francaise entertained the Cercle Francais with competition, songs and dancing in the R. V. C. Common Room.

The evening's programme began with a French cross-word puzzle contest in which the visitors were successful. The winners were Messrs. Caron, Delage, Hardt, Cusson and Gauthier.

The station scene from "Le Voyage de M. Perechon," presented by Misses Longueoe, Brooks, McMartin, Murray and Brock of First Year was a decided success.

During the intermission French songs were sung. The Second Year students delighted the audience with their performance of "Embrassez Nous Polville," in which Misses Lymann, MacSparrow, Hasley and Barre starred.

On behalf of the Cercle, Dr. Villard thanked the Societe for a most enjoyable evening. After the serving of refreshments the members of both societies indulged in dancing for an hour.

will probably be devoted purely to university and Arts Faculty affairs.

"But if our plans do not fall through summarized the Dean "in a few years McGill students will have the best Demonstration theatre of its kind in North America."

DR. MACMILLAN

As the erection of the new Moysse Hall will undoubtedly be of the greatest import to the Department of English among the Departments of the Faculty of Arts Dr. Cyrus Macmillan, Head of this Department was next interviewed.

"The lack of facilities for the presentation of courses in the Theory and Practice of the Drama has long been outstanding in the English Department at McGill," stated Dr. Macmillan.

Experience has taught that the graduates of the department who are spread all over the continent in various teaching and professional capacities felt during their undergraduate days and feel even more now the need of such a course at McGill. Constant appeals are being made to the Department for advice on problems which arise in the presentation of dramas by graduates. With the inclusion of Moysse Hall in the proposed list of changes to the Arts Building, it is hoped that facilities modelled after the world-famous Baker "Workshop" at Harvard will at last be provided to allow the presentation of such a course. With the establishment of a small "Workshop" in Moysse Hall, conditions for the offering of such a course will be ideal, as two of the graduates of Baker's Workshop at Harvard who are now prominent members of the English Department here, will be able to give the results of their experience both in the establishment of the facilities and the presentation of a course in the Technical and Setting of the Drama. A stage will probably be installed which can be used for the presentation of revivals of both the Elizabethan and Restoration stage. The dressing rooms of the stage will serve a double purpose by providing much-needed conference rooms for the first year classes and assistants.

It is in connection with the first year classes which have reached a numerical proportion which exceeds accommodation in the Arts Building at the present time that Moysse Hall will fulfil its other fundamental purpose of erection. It is fitting that this hall, erected in memory of the former head of the English Department should provide accommodation for his favourite class—the First Year class in English and provision will be made for the comfortable seating of this and other large classes of the Faculty for presentation in suitable surroundings of the most heavily attended lectures.

It is for the purpose of providing for these urgent wants of the larger departments of the Arts Faculty that Moysse Hall is to be erected and used for strictly academic purposes. Dean Moysse himself as well as the late Prof. Lafleur regretted the lack of such facilities and looked forwards to the day when they would become a valuable material asset to the English Department at McGill.

Prof. DuRoi, Head of the French Department and several other professors of the Faculty concurred in the value Moysse Hall will be to Arts and the opinion was expressed that the Arts Theatre must be for the Arts Faculty and for strictly academic purposes.

OLD MCGILL 1926

As previously announced, distribution of the Annual will commence April 1st. Certain changes however, in the times of distribution to the various faculties have been deemed necessary by the Board. These will be announced on the Milton St. and McGill College Avenue Bulletin boards. Annuals will only be distributed as described on these placards. The attention of all subscribers is drawn to the fact that twenty-five cents Government Tax will be collected at time distribution

SENIOR HOCKEY CAPTAIN ELECTED

Arthur Abbott Elected Captain, and Gammel, Manager

Arthur Abbott was elected Captain of the Senior Hockey team, and Bob Gammel, Manager, at a meeting of the Hockey Club last night. Dr. P. G. Tees was again elected Honorary President of the Club.

Manager Quackenbush was in the chair, and opened the meeting by reading the minutes of last year's gathering.

In his report, which the manager read, he briefly reviewed the schedules of the three teams, and congratulated the Intermediate squad for winning the Intermediate Inter-collegiate title. His thanks were extended to Bob Gammel, Charley Hewson, Billy Murchison and W. Whitehead for their untiring efforts. Those responsible for the equipment meted out to the first team were to be congratulated, for at Boston those seeing it, declared it to be the finest equipment they had ever seen. Any success that the team had this year, was due to Frank Shaughnessy's hearty co-operation and untiring work with the squad.

The past manager had several recommendations to make which were:

1. That equipment only be handed out next year to members of the teams of this year, before the Actual picking of the squads. This year the equipment was handed out to about sixty men at the opening practice, and a lot was never returned.
2. That player's living expenses while on American trips be increased, where a surplus is shown on the amount previously guaranteed. Last year the expenses allotted were found to be insufficient.
3. That the Beaubien Cup series be changed, to a system whereby the best two out of three games be counted as a final win, including the schedule C.I.H.U. games.

That the Senior team does not play in the city League. H. A. Quackenbush also asked that Intermediate Uniforms be turned in as if they were not, it would mean that the same squad next year, would be without.

ART ABBOTT

Star wing player who has been elected Captain of the McGill hockey squad for next season.

DR. BLAND SPOKE TO OPEN MEETING

Compared Christianity of Jesus and of Paul

Dr. Bland gave a most interesting address on "The Christianity of Jesus and the Christianity of Paul" to the Wesleyan Theological Society last night.

Dr. Bland opened his lecture by stating "That the greatest offense in scholarship is the blurring of differences." He continued that it was useless to blur and try to hide the differences between the teachings of Jesus and of Paul. Dr. Bland maintained that Paul's idea of God was one of a cold, hard and merciless power who had to be placated while Jesus pictured God as the Father from whom one could expect forgiveness and love.

Dr. Bland said that modern young people could not understand St. Paul's idea of God. The speaker continued to point out a few of the differences between Jesus and St. Paul. The latter could see little or no good in marriage and to him childhood was but a synonym for silliness. Jesus on the other hand held womanhood and marriage in the highest light and to him a child's spirit had that innocence for which we should all strive. St. Paul had a fierceness and impetuosity to him which made him more of a man's man while Jesus had a broader sympathy and gentleness which rendered him both a man's and a woman's man.

St. Paul too looked upon Jesus more as a sacrifice for our sins and taught that though it was desirable to follow Christ in our daily life yet if one believed in Christ his salvation in the end was assured. Christ to him was not so much a part of the Godhead as a means of escape from our transgressions. Jesus however taught that for salvation not only was belief in him necessary but that it was essential that his teaching be carried out in our life each day.

Jesus said that sin always brought its own punishment and that the only way to escape is to have the spirit of a little child. The speaker went on to say that most people are not trying to be like Jesus because they depend on St. Paul's theory and that thus this theory is the greatest hindrance the church has to encounter. He said that it was the duty of the ministers to teach the people to follow Jesus Christ as the only way in which to find true salvation.

Dr. Bland closed his speech stressing this point that the church must be bettered and must follow Jesus Christ before the world can be made better.

Dr. Rose introduced the speaker, Scott Miller, President of the W. T. S. thanked Dr. Bland and expressed the gratitude and admiration of the audience.

Dr. Bland will speak at the Sherbrooke Street Methodist Church to-night and at Douglas Methodist Church to-morrow night.

COACH VAN WAGNER TO ADDRESS MEN

One More Practice Before Provincial Meet

Yesterday afternoon, several McGill men turned out at the Craig St. Armoury for one of the final rehearsals prior to the Provincial Meet on Saturday. Coach Van Wagner was on hand assisting the men, and helping them as he saw fit. Hurd, Brodie, Rubin, Airey were out and will take part in the meet along with Goforth who will probably compete against Paabo Nurmi and Willie Ritola.

This afternoon at 5 o'clock in the ball-room of the Union, Coach Van Wagner will address a meeting of track-enthusiasts. This address will be illustrated by some good views of the Olympics being included in the collection as well as pictures of the "Pennsylvania Relays," which are very instructive and illuminating. To be successful in athletics, first practice is necessary but the fine points can only be learnt through following the example of others, therefore all possible should be present at 5 o'clock p.m.

To-morrow is the last day on which Craig Street Armoury will be used, all further track-work will be done from Moisson Hall.

ONE VOTE MAKES CAMERON CHEER LEADER; MORRIS IS CANADIAN CLUB PRESIDENT

N. W. Philpott and G. B. Puddicombe Elected to Athletic Board—Less Than Six Hundred Students Voted.

One vote made Jack Cameron cheer elections are as follows:

CANADIAN CLUB
Morris, A. L. 395
Spector J. 233

CHEER LEADER
Cameron J. A. 229
Duckworth, J. M. C. 228
Dunne, F. S. 99
Carney J. A. 89

ATHLETIC BOARD
Philpott N. W. 552
Puddicombe G. B. 314
Gorré G. Y. 279

The exact figures covering the leader of the session 1925-26. A. L. Morris was elected to the presidency of the Canadian club by a substantial majority. Noolie Philpott and Bev. Puddicombe are the undergraduate representative on the Athletic Board of Control. Philpott polled over five hundred votes while Puddicombe had a majority of 35 votes over the defeated candidate. Less than six hundred students exercised their right of franchise. The exact figures covering the

GYMNASTICS AND DANCES THIS WEEK

Three Part Programme in R. V. C. Convocation Hall

APRIL 3 and 4

Dancing for Audience and Performers on Saturday Night

The time is fast approaching for the R. V. C. Demonstration of Gymnastics and Dancing which is taking place in the Convocation Hall at 8 o'clock on Friday and Saturday April 3rd and 4th.

The proceeds of this performance will go to the University Settlement and to the support of women's athletics besides helping to send the basketball teams to Toronto and Kingston.

Due to the untiring efforts of their instructors, Miss Cartwright, Miss Wain and Miss Harvey, the students have worked most diligently this session and hope to make the demonstration a greater success than any given in preceding years.

Exhibitions in dancing, fencing and gymnastics comprise the programme which opens with an effective tableau illustrating the different branches of athletics at the R. V. C. The gymnastics are club and wand drills, rhythmic exercises and formal gymnastics, as well as a new feature consisting of four amusing little team games.

Fencing is a comparatively new sport at R. V. C. having been taught only for the past two years. However, the class has turned out some students with great skill in handling the foils.

All the dances will be exhibited in costumes of bright and varied colours.

A dainty little Bluebird dance opens this section of the programme folk-dances and a Spanish dance. Pierrots and Pierrettes will polka together as well as Scottish shepherds and shepherdesses in typical costumes. A Chinese dance is very effective with its characteristic lanterns.

All these and more items will form the interesting programme which is sure to please all in its two performances.

The tickets are 75 cents and \$1.10 and are available from any R. V. C. student or from the porter at the R. V. C.

Dancing will follow the demonstration on Saturday April 4.

MACCABAEANS WILL DANCE AND BANQUET

Otto Klineberg, Guest of Honor at Venetian Tonight

To-night, the Maccabean Circle will "dance and dine" at the Venetian Gardens as a fit ending to the year's activities. This is the annual banquet of the circle, and it is expected that not only will a large number of men and women around the university turn out, but that there will also be quite a few of Maccabean graduate members in attendance. After the banquet and a few toasts, there will be a talk by Otto Klineberg, and then there will be dancing.

ANNUAL WILL BE READY ON APRIL FIRST

Alterations Made in Times of Distribution

OUT ON TIME

Twenty-five Cents Government Tax to be Collected

"The Annual" will be ready on April first, in accordance with the promise made in January, but in order that undue pressure may not be exerted on the members of the Board, certain changes have been made in the times of distribution. These changes will be announced on the Milton Street and McGill College Avenue bulletin boards. Annuals will only be distributed at the times indicated. To come to the room at any other time will be useless. These statements were made yesterday by the management of Old McGill 1925.

Regarding the government tax, it was pointed out that it will be absolutely necessary for students to pay this, as they have done in the past two years. "We wish to draw the attention of all subscribers to the fact that these twenty-five cent pieces do not go to the Annual Board, but to the government, as sales tax. We are sticking to our original intention of reducing the price of the book. As far as we are concerned we are getting \$3.50 for the book as opposed to \$2.75 which was the price of last year's volume."

Advance forms seen yesterday by a representative of the Daily would indicate a very successful volume. The book is sixteen pages larger than the 1925 edition. It is bound in the best quality imitation leather of a very rich blue shade. The drawings are of a high order, and two colour plates are included. These include the new Thomas Roddick memorial gates in four colours and the McGill coat of arms in the correct shade of red. There is also a full explanation of the history and meaning of the University crest. Cartoons of persons famous around the campus are also included.

Distribution will take place from the McGill Annual Room on the second floor of the Union.

Otto Klineberg, the guest of honour, a graduating student, after having been a member of the circle for the past ten years. He has certainly been its most prominent member for some time and is well worthy of this fine tribute of the Maccabean Circle. Several visitors will also be present, including Basil McLean, President of the Students' Council, and McLeod, representing the Students' Christian Association.

The after-dinner list is to be as follows:

The King
The Alma Mater
Chas. Brownstein, Basil McLean,
The Hebrew University
S. Schwisberg, Dr. A. O. Freedman
Otto Klineberg
The Ladies
Gordon W. Levy, Miss M. Ratner
The Graduates
Leo Edel, Mr. M. Bernfeld
The final regular meeting of the Maccabean Circle is to be held next Sunday afternoon in the Union to elect officers for the coming year.

"What do you do when you are kissed?"
"I yell."
"Would you yell if I kissed you?"
"No, I'm still hoarse from last night."—Ed.

MONTREAL, TUESDAY, March 31, 1925

A PARTING WORD

With the exception of the Convocation Issue which will be published on April 30, the Daily ceases to exist for the remainder of this session and follows in the pathway to obscurity already traversed by most of the undergraduate organizations. The few activities that yet retain a spark of life will soon go the way of the majority. The executives who were wont to nourish the activities in which they were particularly interested are now beginning to fully appreciate the value of time and to utilize the fleeting days to the best advantage in the serious pursuit of elusive knowledge. The recluse, the athlete, the executive, the scribe, the lover of midnight frolics and the minions of the social world must of necessity direct their energies into a common channel; they must now confine their efforts to the achievement of the one goal that is ultimately the most desirable and best of all and the one which every student, in the true sense of the word, seriously hopes to attain. Who in this category of types will be most successful in the end, notwithstanding examination results, is an inexhaustible subject of debate between the recluse and the executive between the first rate athlete with a third rate academic standing and the studious individual who has a first rate academic and no athletic standing. Here at McGill there are widely diversified types of people with diversified interests and inclinations, and, we hope, few who do not find a proper and vital place in the undergraduate structure nor contribute anything towards its upkeep.

A brief survey of the work done by the multifarious organizations on the campus and the measure of success experienced by them, would indicate that only a negligible minority of students can be numbered among the recluses and that very few do not consider some form of extra-curricular training an essential and important phase of college education. A balanced programme of studies and extra-curricular activity has been advocated by the President of the Council as the ideal aim for the undergraduate. Although this ideal has not yet been fully realized there can be little doubt that the nearest approach to it has been made this year.

In athletics, notwithstanding the pessimistic views expressed by some few students, McGill this year claims the right to first place among the four competing colleges. The Red and White Revue was an outstanding and unexcelled success. The work of the Council has covered a wide field and many plans for furthering the interests of the student were carried into effect. The achievements of the minor organizations can be compared favourably with those of other years. Where success was not pronounced in few cases was this the result of insincerity of purpose, loyalty or hard work on the part of the students involved.

Not without regret do many of us relinquish, temporarily and perhaps permanently, the associations of friendship that executive work has brought. Comradeship has been, and always will be, one of the inestimably valuable rewards for those who have assumed responsibility in guiding the destinies of undergraduate affairs.

MOYSE HALL.

The publication of interviews with Dean Mackay of the Arts Faculty and Dr. Cyrus Macmillan, Head of the English Department, in to-day's issue will be received with marked interest by those who have been awaiting the announcement of proposed changes to the Arts Building. Since the advocacy of a theatre in the new auditorium of the Arts Building in these columns yesterday it has been brought to light that definite plans in this regard are under the consideration of those concerned with the construction of the new memorial Moyse Hall, which is to be a prominent part of the new building. Through the foresight of those immediately interested, the projected plans of Moyse Hall have been made to include several features which will remove wants of long standing in a number of departments of the university. These needs have become vitally evident to both students and staff and the probability that they will soon win satisfaction strikes a chord of pleasurable appreciation and anticipation in the minds of everyone connected with the university.

It is hoped that Moyse Hall will fulfill a threefold purpose—plans call for the provision of lecture-room accommodation that will tax neither lecturer nor student, for large sized audiences of greater small room accommodation, such as conference and discussion rooms, and of facilities for a dramatic "workshop" to permit the introduction of practical study of the presentation of the drama. With the commencement of such a course of study McGill would take another step forward through the activities of an admirably fitted English Department in a sphere in which the standards of the age grow more and more exacting. Till now the provision of such facilities has been little more than a vague dream. The thanks of the student body is wholeheartedly offered to those who are devoting their efforts to convert that dream into reality.

NOTICES

GOLF CLUB

There will be a meeting of the McGill Golf Club on Thursday at 5 o'clock in the Union. Officers for next year must be elected and plans for next year's trip to Toronto discussed.

PSYCHOLOGICAL SOCIETY

Annual Business Mtg. of the Psychological Society will be held on Friday, April 3rd in the Arts Building Room 107.

Election of officers for 1925-6 will take place as follows:—for President; Vice-president; Secretary-Treasurer; and Year Representatives.

A full attendance is requested.

CHEMICAL SOCIETY

The next meeting of the Chemical Society will take place on Friday, April 3rd at 5 o'clock in the Chemistry Building. Mr. C. P. Bardorf of the St. Lawrence Sugar Refineries will give a lecture on "Decolorising Carbons". All interested are invited to attend.

SCIENCE UNDERGRADUATE SOCIETY

The last regular meeting of the Society will be held in Room 33 of the MacDonald Engineering Building on Friday April third at 5 p.m. The new officers for the ensuing year will be installed. Business includes election of faculty football manager and report on activities etc. All Science men are urged to be present.

L. B. ALMOND
Secretary

LOST

Small leather covered note book (7 rings) with notes for past month. Finder please leave with Janitor of Engineering Building or G. M. Merritt, Science '25.

LOST

A key to Zeiss Microscope box letter Z on one end. Please return to D. M. Angevine, 308 Prince Arthur West or phone Plateau 7472.

MCGILL OLD SCOUTS

Annual meeting of the Club will be held in room "B" of Strathcona Hall to-night at 6 p.m. For particulars see "Daily" columns.

HOCKEY EQUIPMENT

Will the following men please turn in to Major Forbes' Office, hockey equipment issued by the Athletic Board:—
Joan Gordon, Sc. IV; C. S. Code Arch. II; E. Wolfe, Sc. I; W. A. Milligan, Med III; D. Lack, Arts I; L. A. Lavoie, Comm. I; E. H. Eberts, Arts I; A. W. Boos, Arts II; A. W. Jones, Arts I; G. D. Plead, Sc. III.

CHESS TEAM

The final match with National will be played at 8.15 p.m., Wednesday at the Union. The following are requested to turn out:—Prof. Slack Garellek Lidsky, Kursner, Edel, Eichenberg, Cohen.

FOOTLIGHT FANCIES

The Montreal Junior League will present "Footlight Fancies" at the Orpheum Theatre. April 28th, 29th, 30th and May 1st, 2nd. Tickets at \$2.50 and \$1.75 may be obtained from the Janitor of the Arts Building.

R. V. C. A. A.

There will be an important meeting of the R. V. C. A. A. at 1 o'clock on Wednesday April 1, in the R. V. C. Common Room.

Business:—Awards
M. McWALTERS
Pres.

McGibbon, Mitchell, Casgrain, McDougall and Stairs.

MEDICALS TO HOLD ELECTIONS WEDNESDAY

The elections for officers of the Medical Undergraduate Society takes place next Wednesday from 9 a.m. to 6 p.m. in the New Medical Building. The nominations for the various offices are as follows:

President—
Jack Wall
K. S. MacLean
Vice-President—
N. P. MacDermott
Chas. O'Regan
Secretary—
P. Michael
P. Doyle
R. J. Caldwell
N. Render.
Ass. Secretary—
Ward Allen
Wm. Brewer

A woman friend dropped in the other evening to chat with the wife and was surprised to find the husband, enveloped in an apron, washing the dishes.

"Where's the wife?" the visitor asked, cheerily.

"Over at the barber shop," came the grump reply.—Philadelphia Public Ledger.

R. V. C. GYM. DEM.

The Annual Demonstration of Gymnastics and Dancing will be held in the R. V. C. Convocation Hall on Friday and Saturday, April 3rd and 4th at 8 p.m. There will be dancing after the performance on Saturday night for any who wish to remain. Tickets at \$1.10 and \$0.75 may be bought at the door.

R. V. C. UNDERGRAD

Nominations for the offices of President, Vice-president and Secretary-Treasurer moved and seconded and supported by ten names must be in the hands of the president or secretary-treasurer by April 6.

ROWING CLUB EXECUTIVE

A meeting to-day at 5.00 p.m. in the Union.

INDOOR BASEBALL

Final game between Reds and Whites will be played to-day (March 31st 1925) in the M. H. S. gym. Will the following players please be on hand at 5.15 o'clock.

Reds: Kenrick, Milne, Cameron, Little, Punde, Morrell, Scott, Shipman and Consiglio.
Whites: Bronson, Eddy, Grassick, Moffat, McPhail, McGerrigle, Armstrong, Jamieson and Layhew.

After this game the election of officers for next year will be held. Will those interested be out.

INTERFACULTY BASEBALL

Final games in interfaculty league will be played.
April 2nd (Thursday) Arts vs Med
April 3rd (Friday) Commerce vs winner of above.

Definite arrangements have not as yet been made for the M. H. S. gym for Friday, if such cannot be made a notice will appear in this column.

Name
Address

IMPERIAL

Vaudeville lovers cannot afford to miss the show at the Imperial this week if they wish to see a fine bill. Nothing exceptional, nothing new but real acts from start to finish without a lemon on the programme. Kenny, Mason, and Scholl, preformed many difficult stunts on roller skates and Miss Kenny the feminine member of the troupe added much to the attraction of the act. Three young ladies known as the Ruby Trio gave an interesting fifteen minutes of singing and dancing. An exceptionally clever exhibition of ventriloquism was given by McCormick and Miss Wallace, in a school skit in which half a dozen dummies were used.

A particularly good repertoire of old fashion, popular, and humorous song was rendered in a most interesting manner by two young men McFarlan and Palace.

The feature act of the programme was "Alice in Toyland" a short musical comedy given by a troupe of midgets and although the act has not been changed much since it was here before the little people are always interesting and perform well.

If you are looking for action fun and thrills you should not miss the picture, "Youth and Adventure" Richard Talmadge riva Douglas Fairbanks in acrobatics. The plot is not much but anyone should get a kick out of the many fights, dare-devil jumps, fast driving, and rapid-fire jockeying.

Judge—What's the charge?
Tough Cop—Suicide.
"How did he try it?"
"He took a punch at me."—Hamilton Royal GaBoon.

Maybe He'll Find Her.

Honest Admirer (calling at girl's home)—"Is Miss Jones at home?"
Maid—"Sorry sir, but she is in negligence now."
Honest Admirer—"That's too bad. I was just leaving for Europe myself."
—Moonshine.—Ex.

OR NEVER WILL

The Lord made earth and skies
And man in just six days,
He rested on the seventh
To pass the time away.

On the eight he made a woman
(The thought how makes him wince)
For neither he nor man,
Have ever rested since.

Unusual Opportunity to Tour Europe Special Concessions for McGill

For the past ten years all eyes have been turned to Europe, the land of our forefathers. In order to give students, professional men and women, and their friends, the opportunity of seeing Europe at a minimum of cost and via the sheltered and attractive St. Lawrence route, Guy Tombs Limited of Montreal has arranged two all-expense and personally conducted Educational Tours to Europe during the summer of 1925.

The first tour will leave Montreal June 19th, on the S.S. "ATHENIA" for Glasgow, returning from Southampton and Cherbourg on the S.S. "AUSONIA", July 17th, to Montreal. The second leaves Montreal July 3rd, on the S.S. "LETITIA" for Glasgow, returning from Southampton and Cherbourg on the S.S. "ASCANIA", July 31st, to Montreal.

Each tour will last thirty-seven days, and in the 8250 miles covered, ten university centres and twenty-eight celebrated ports and cities are visited in five European countries—Scotland, England, Holland, Belgium and France. The cost will be \$330.00 plus \$5.00 tax.

The tour representative travels with you to provide for your complete comfort and freedom from care. He looks after trains, provides automobiles, solves hotel problems, attends to passports. Your daily programme is all planned and you are enabled to see the worth-while things intelligently, yet with economy of time, effort and money.

These very comprehensive and carefully planned tours are intended to give the artist, student, teacher and tourist the opportunity of realizing, at modest expense, what has often been the dream of a lifetime, and they include every variety of scenery and of churchly charm, also the towers, castles, cottages, stately homes and places of historical and educational note which form the cradle of the race.

These tours are very strongly recommended by college principals all over Canada and the U.S., who state that they are the best offered for the money.

The sea voyage itself is a panacea for all ills. There is excellent company and the intercourse with the growing generation of Canada and the States and kindred spirits aboard will engender valuable life-long friendships. Whether your requirements be health, a changed outlook, inspiration, education, or merely a vacation, the benefits obtained will be lasting.

Three days are spent on the romantic Scottish border; a week in Merrie England, including three days in the greatest city of any age or country and a visit to the great British Empire Exhibition; a day in Holland; three days in Belgium; and six days in Paris—8250 miles at the rate of 4c per mile, including all expenses.

On account of the special interest in Rome this year, several side trips have been arranged from Paris, examples: two weeks in Switzerland and Italy, \$150.00 with the option of returning via the Riviera; two weeks in Rome for \$127.00; one week in Rome for \$83.00.

Exclusive receptions are being arranged by overseas students at the different educational centres and a very special and historical affair in London, the memory of which will long continue.

In order to accommodate McGill people, who wish to take advantage of the exceptional arrangements on ship board only, a limited number will be accepted from Montreal to Glasgow and from Southampton to Montreal at \$155.00 for the round trip.

Those desiring to take advantage of this unusual opportunity, should apply to Miss M. Christian Edwards, B. A. or to E. C. Common, B.A., Law '26.

Considerations Suggested By Dr. Eve's Lecture On Limitations Of Science

(Continued From Page One)

To-day the foundations of mathematics have been sifted by penetrating philosophical criticism, and physics has become more philosophical because more logical and unified.

Hence an attempt, like J. A. Hobson's to give a formulation of the foundations of science without any reference to philosophical criticism is more anachronistic than ever before. The theory of knowledge and logic

which now are very intimately connected, and which have shown a greater development than any other branch of philosophy during the last twenty-five years, have had a potent influence on the development of modern scientific method, and in turn science has reacted most favourably on the work of genuine philosophers, who are no longer of the old apriori school but who have learnt from the work of Hume and Kant. Of all the great philosophers Kant, the disciple of Newton, stood nearest to the point of view of physical science which he viewed sympathetically, and his influence is to-day clearly reflected in the writings of Eddington and Whitehead more especially in the latter's Concept of Nature, and to a lesser degree in the works of Poincaré. The influence of Hume on Ernst Mach is obvious.

The answer to the question whether the order of experience is in mind or in Nature is I think this—that it is in both. If it were not in the one, it would not be in the other and vice versa. The question results from a tendency to dualism which runs through so much of human thought, and the origin of which is fairly obvious and need not be commented on now. The human mind is not an entity to be placed over against Nature, since it is itself a product of Nature. Notwithstanding the Governor of Tennessee, it has gradually developed from an animal forerunner and become adapted to its physical and social environment. That there should be some agreement between its principles and demands and a course and arrangement of natural phenomena is thus quite intelligible. Just how much is a question for philosophy and science to ascertain. Were Nature a chaos it would be unintelligible how the human mind could have developed as it has. Kant saw this clearly when he said against the claims of a certain kind of Idealism: it is quite conceivable that Nature might have been so constituted that our intelligence would have remained a dead and therefore unknown capacity.

The system of the sciences, in which of course psychology is to be included, because since the disappearance of the soul substance theory it is no longer encumbered with an incalculable entity, which will do almost anything you please and yet is more otiose even than the ether, develops through a combination of logic and sense perception. Without sense perception there would probably be no logic. With logic, (including mathematics), there would be no ordered system of our sense perceptions. Galilei was the first to grasp this clearly, and is the real founder both of the concept of modern science and of modern scientific method.

The progress of pure science and its applications have been so great of recent years that no one can safely lay down limits to its advance. This seems to be indefinite. One of the greatest theoretical advances has been the recent subsumption of concept of mass under that of energy by which the long outstanding dualism between the ponderable and the imponderable in physics has been resolved. Another fictitious problem like that of the action of the soul on the body has thus disappeared. If there be any limitations of science these consist in the logical and experimental conditions which are involved in all systematic knowledge. These conditions are founded in the nature of the human organism including its powers of sensation and reasoning, (involving analysis and synthesis), and in the actual physical and chemical constitution of the universe of which the human organism is a part. But these means and conditions of knowledge constitute its foundations rather than its limits, seeing that without them there would be no science. Science gives a simplified account of reality. But no thinker, except Bergson, holds that this simplification falsifies it, and that we are limited by the use of our intelligence in comparison with the instincts of certain invertebrates such as ants, bees and wasps, who in their operations are not more inflexible than our carpenters and plumbers. Bergson's own concept of science is extraordinarily limited, and he has actually expressed the view that geometry can measure only straight lines and not angles.

If only science will remain within the sphere of experience and not strive after transcendence, we shall hear less of its limitations, a term which tends to place the emphasis on the wrong side. The limitations, so-called, of science are for the most part the conditions under which it is possible.

Dr. Eve regarded it as a limitation of Science that it required repetition of events. That phenomena can be repeated seems to me to be a strength, not a weakness of experimental Science. But can there be no science unless phenomena are repeated?

CHESS TEAM WINS OVER WESTMOUNT

Victory in League is Certain

Last night the Chess Team successfully overcame the Westmount Club in a return match at the Union, with a perfect score of 6-0. This victory gives the Chess Club a lead of five points in the League, and as only one match remains, it is practically certain that the trophy comes to McGill. At first table Prof. Slack overcame an irregular defence, and with his usual success won out. Harry Lidsky, Arts '25, plied against a prominent Montreal player, who was one of the few to make a draw with Maroczy, the Hungarian champion, when he played here, won after a hard struggle. The third table was played by L. Kursner, Arts '26, who turned seeming defeat, into a position which resulted in a win. The other three men, Edel, Eichenberg, and Cohen, won by default.

The last match with National will be played Wednesday evening at the Union.

The same men are requested to turn out. The following was the line-up:— Prof. Slack, 1 Gaudet, 0 Lidsky, 1 Sanders, 0 Kursner, 1 Baldwin, 0

ARCHITECTURAL SOC. ELECTED OFFICERS

The Architectural Society held its last meeting of the year yesterday afternoon. The purpose of this meeting was to elect officers for the coming year. The following were elected:— President—A. K. Mills Vice-Pres.—A. W. Wallace Sec.—I. R. Glasco Treas.—R. S. Perry Reporter—T. Archibald J. G. Hughes was asked to represent the department in all matters relating to business outside the department proper.

The meeting closed with the usual talk of the annual Architectural Ball.

PROMINENT SPEAKER'S LECTURE POSTPONED

Because of an examination for the senior year in medicine it was decided to postpone the lecture by Dr. McDougall until a later date.

The entire student body and especially the students of Medicine will await anxiously to hear the Doctor who is one of the prominent men of the city, the president of the Harbour Commission and a McGill graduate.

able or re-occur? If so, then those branches of knowledge called historical must be excluded from the sciences. Science is, however, scarcely synonymous with physical Science, even though physics presents the most developed account of our knowledge of reality.

Fists Falls and Foils

The provincial wrestling championships will be held at the National A. A. to-night and to-morrow night. Two men from McGill have entered, and should make a good showing, they are M. Greenberg in the 125 lb. class and T. Demitre, intercollegiate champion, who will wrestle in the 175 lb. division.

George H. Rumpel, Science '24, who is now at the Harvard Graduate School, has entered the wrestling championships at that University. Rumpel is well known at McGill having held the intercollegiate heavy-weight wrestling title for three years as well as the Provincial. Although the former representative of the Red and White should win, he will meet some stiff competition in C. A. C. Eastman who last year won the N. E. A. A. U. championship.

DENTISTRY '27 HOLDS ANNUAL ELECTIONS

A. C. Voisard was re-elected president of Dentistry '27 at a meeting held recently, when the officers for the coming year were chosen. The following were also elected to various positions:—

Vice-president—R. E. Dagg. Secretary—S. A. Robinson. Treasurer—R. Herman. Mgr. of Athletics—C. E. A. McCabe. Football Mgr.—J. R. Carson. Hockey Mgr.—E. C. Burbank. Indoor Baseball Mgr.—A. L. Scherzer. Basketball Mgr.—R. C. Thompson.

Protect Your Money While Travelling

Other Safe Ways:
Letters of Credit
Drafts
Money Orders
Transfers by Mail or Wire

ONE of the safest ways of carrying money when travelling is by means of Travellers' Cheques.

They are as good as cash in almost any part of the world and have the distinct advantage of protecting your money against loss. They are self-identifying and can be cashed only by the original purchaser.

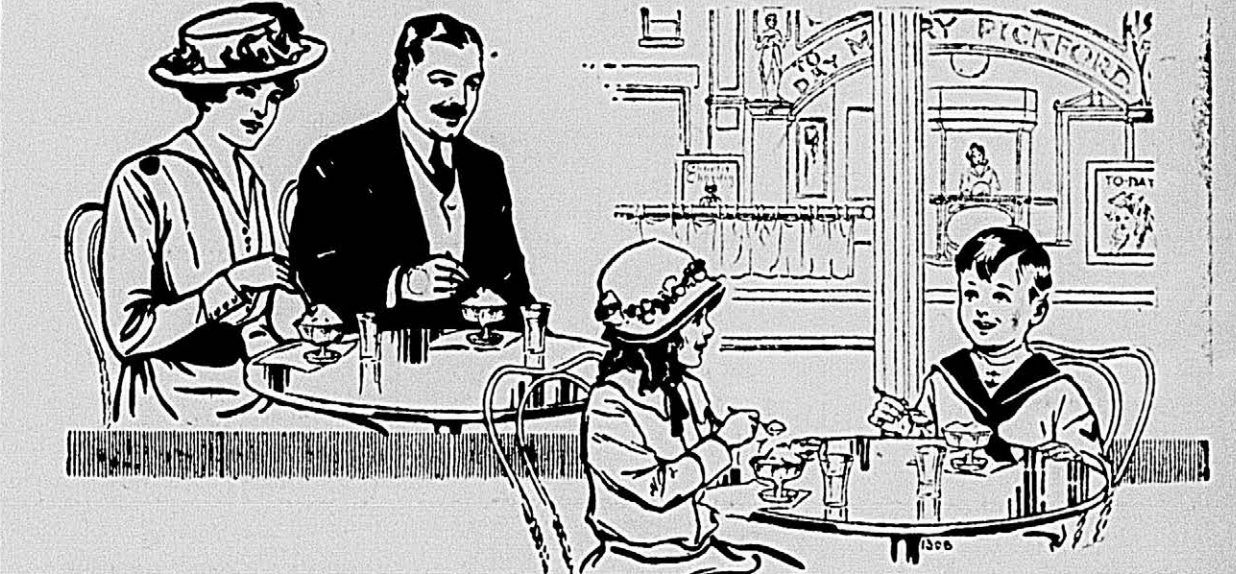

Travellers' Cheques in your pocket are equivalent to ready money.

Education In Sweden

(Contributed)

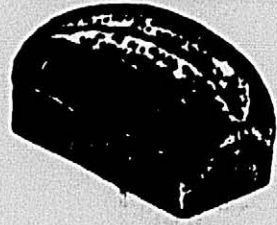

During his recent visit to McGill University, the illustrious physicist Dr. Siegbahn of the ancient University of Upsala, gave an interesting account of the educational system in Sweden. The reader will readily gather the reason for the remarkable advances recently made by Scandinavian countries owing to their magnificent system of education.

Before proceeding to details it might be well to illustrate this point by a story. Dr. Pupin discovered a method which made long-distance telephony possible between such distant places as New York and San Francisco. This scheme was patented in almost every country in the world and the nations had to pay royalties for the use of the method. The Swedes, however, and the Swedes only, appear to have been sufficiently well-informed to know that an Englishman, Oliver Heaviside had several years previously advocated this very system in published papers. It has often been said that knowledge is power and certainly in this case Sweden was saved the expense of royalties owing to their superior knowledge.

A boy or girl in Sweden spends three years at an elementary school between the ages of six and nine. The young students then proceed for a six-years' course at an intermediate school which retains the old name of grammar-school. All teachers at such schools must have a University degree. Between the ages of fifteen and eighteen the boy or girl proceeds to the high-school, where all teachers must have the Ph. D. degree.

Now let us consider the student who is proceeding to Medicine. He has already done all his Physics, Chemistry, and Mathematics up to the Differential Calculus, and he completes his course of Medicine by eight full years, which sometimes extend to nine. All engineering students, on the other hand proceed to a central engineering school at Stockholm for their engineering instruction. Most young Swedes know, in addition to their own languages, three other languages selected from English, German, French, Latin, Greek (which is alternative with Chemistry). An examination for matriculation in these subjects consists of unguess translation in every case from Swedish to the language

KAMPUS KARAKTERS

Noolie Philpott

Newell Willard Philpott (Noolie).
Age—46?

About the 13th edition to the Phil-
pott Family arrived on September 27th,
1902 and has been certainly labouring
under the unlucky spell associated
with that number ever since. If his
football experiences are any indica-
tion.

The Ambitious City of Hamilton
claims him as her own and the na-
tives say he was not born with a
football in his arms though he early
showed his aptitude for this line of
sport. At the Hamilton Collegiate
Institute, as a track athlete and foot-
ball player he first became prominent
and captained his collegiate team to
the championship in 1919.

He came to McGill in 1920 and en-
tered Medicine, which has since be-
come a side line.

Since this time "Noolie" has been
chasing the pigskin in the shape of
either a baseball, basketball or foot-
ball. His record shows that as a
pitcher for class and faculty baseball
he had success, playing on seven
championship teams. He has served
two years on the senior basketball
team and for five years has scintillated
on the football squad. In indoor
athletics he has an unbounded wealth
of talent, and his rugged frame sits
just as prettily on the parlor chest-
erfield as it does on the football field.
He does his stuff, well.

This year he has been an energetic
vice-president of the Union. Yester-
day he was elected to the Athletic
Board. Next year he will captain the
Red and White rugby team and will
probably figure prominently in senior
basketball.

LIBERAL-CONSERVATIVE MEETING ON FRIDAY

A mass meeting of the students in-
terested in the policies and work of
the Liberal-Conservative party is to
be held at 5 p. m. next Friday in the
Union hall-room, where it is planned
to organize a Liberal-Conservative
Association of McGill University. A
number of prominent Conservative
students interviewed the Hon. S. P.
Tolmie, former minister of Agricul-
ture last week and discussed plans
for the proposed organization. Dr.
Tolmie will endeavour to have the Rt.
Hon. Arthur Meighen address the
McGill conservatives some time in
April. There are strong indications
of an early election either this summer
or this fall, and Conservative organi-
zations are already busy laying the
foundation for a successful campaign.
Friday's meeting will be a splendid op-
portunity for students of Tory sen-
timent to support, by their presence
the ideals of such men as Tupper,
McDonald, Borden and Meighen. A
cordial invitation is extended to R. V.
C. students who might be interested.

under consideration. In the same way
a student wishing to pass in Mathe-
matics or in Physics is given a problem
paper all unseen, set by a Board of
Examiners from all the Universities of
the country. In order to gain admis-
sance to a University they must solve
at least three out of seven of the un-
seen problems. It will be noted that
the above system absolutely pre-
vents cramming in Mathematics, Phy-
sics, or Languages.

The whole load of teaching at pre-
sent endured during the first two
years at a Canadian or American Uni-
versity is thus placed upon the high
schools. Indeed the law of Sweden
forbids any professor to lecture more
than four hours in a week, or a
teacher in the high school to teach
more than about eighteen hours per
week. Thus the universities encour-
age the students to work for and by
themselves. Entrance into the uni-
versity is at the age of eighteen, and
there will be at least eight and prob-
ably ten years before the Ph. D. is
obtained.

It will also be noted that in the
matriculation examination, the exam-
iners who are professors of the Uni-
versity, not only set the papers but
also visit the schools and ascertain on
the spot the progress of students and
incidentally the efficiency of the teach-
ers.

All comparisons are odious and
therefore the reader must for his own
opinion as to the relative value of the
methods of this system of education
and of his own system with which he
is more familiar.

DR. MACLEAN RECEIVES GOV'T APPOINTMENT

Word has been received from Ot-
tawa that Dr. A. R. M. MacLean, of
the Department of Chemistry, McGill
University, has been given an appoint-
ment to represent this University as
Official Analyst in connection with the
administration of Fertilizing and
Feeding Stuffs Act.

This appointment, which has been
recently authorized by Order-in Coun-
cil, calls for a representative from each
University in Canada. The duties of
these analysts are to act as referees
in cases of disputes within their dis-
tricts and the decision of the Official
Analyst is final.

OLD SCOUTS CLUB TO HOLD ANNUAL MEETING

The annual meeting of the Old
Scouts of McGill will be held in
Room "B" of Strathcona Hall to-
night at 6 p.m. This will be the fin-
al meeting for the session and it is
hoped that there will be a full at-
tendance in order that the work for
the next session may be well pro-
vided for by the election of the best
officers and by well considered plans.

Following the presentation of re-
ports and the election of officers
there will be a discussion on the
subject of the Patrol System. This
is the basis of the scout organiza-
tion and on its efficient working
rests a large part of the value of the
Boy Scout training as it is outlined
by Sir Robert Baden Powell. Taking
the Patrol Leaders are the real
leaders and the Patrol is the gang or
the fundamental group through
which everything concerning troop
activities and organization should be
carried on.

Since this is a matter which lies
at the root of the whole scout or-
ganisation it is a matter which is
at once vital and interesting. The
subject will be opened by Mr. Sykes
a new-comer from the west. Mr.
Sykes is Gillwell graduate and a
possessor of the Wood Badge and to
those who know the meaning of
these terms it will signify that Mr.
Sykes is well able to speak authori-
tatively on the subject. All interest-
ed are invited to attend. Supper
will be served at a low cost and the
discussion will follow immediately
after the meal.
